Conventional Corrugated

Conventional Packaging Solutions from Boxability

Boxability manufacture all types and styles of conventional glued and stitched corrugated cardboard boxes to order. Boxes can be plain, 1-colour/2-colour print. Boxability can manufacture multi component composite packs, these may include corrugated dividers, foam inserts, layer pads and corrugated cases.

Corrugated Design

Boxability, specialise in the manufacture of corrugated die-cut packaging. With more than 100 standard FEFCO packaging styles, corrugated styles can be manufactured for virtually any need and design. The Boxability specialist design team are happy to produce designs and samples using a CAD system.

Corrugated Manufacturing

Boxability manufacturing equipment facilitates the production of corrugated boxes in a wide variety of sizes, from only a few inches square, up to boxes that fill a standard 1200 x 1000 pallet. Much larger corrugated cases can also be manufactured, usually with heavy duty corrugated cardboard. Production runs can be from 50 to 10,000 units.

Continuous Improvement

Boxability's Continuous Improvement Team have the skill set required to investigate each customers "end to end" process, enabling improvement opportunities to be identified in all areas for example:

- Packaging design improvements
- Lower cost board specs
- Production performance issues
- Ancillary services such as; contract packing, improved stock/supply chain management

Timber Products

Timber Packaging Solutions from Boxability

Boxability supply and manufacture bespoke two-way entry timber pallets, four-way entry timber pallets, CP pallets, ISPM 15 compliant pallets, timber cases, timber crates, plywood cases and timber collars.

Pallet Manufacturing

Customers that choose to use our pallet manufacturing service are issued with a full specification catalogue for every product they purchase. This service ensures consistent quality.

Boxability use the highest quality of timber mainly from sawmills within the UK with sustainable resources.

Case Manufacturing

Boxability have extensive experience in the production of bespoke timber based cases. Timber cases can be constructed in any size. Our larger range includes casing up to 45' long for the steel industry, aluminium works, and exporting shipping agents throughout the UK.

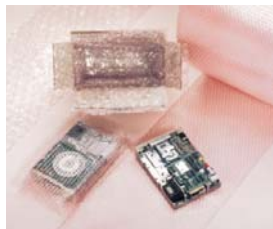

Timber Benefits

The benefits of a timber packaging solution include;

- Improved environmental performance
- Reduced costs of compliance with packaging waste legislation and legal requirements
- Reduced recovery and waste disposal costs
